

SoundTrack® LxT

A Real Breakthrough in Sound and Workplace Noise Analysis

Highlights

- Simple Operation — with just one hand!
- 30 Hours runtime on 4 AA Alkaline Batteries
- USB 2.0 Interface
- Large, Bright, High-Contrast LCD Screen
- Digital Voice Annotation*
- Extremely Rugged — Compact and Lightweight
- Available in Class 1 or Class 2 Versions
- Multi-Language Format for Global Compatibility

SoundTrack® LxT
Compact and lightweight;
Ergonomic layout for
one-handed operation

Multiple Measurements from one Sampling Session

- Real-time dB display
- Real-time Octave Bands*
- Real-time 1/3 Octave Bands*
- Leq (Average w/ 3 dB Exchange rate)
- TWA/Average dB (Other than 3dB exchange rate)
- Lmax
- Lpeak
- Multiple Dose and Exposure calculations
- Time stamping of relevant metrics

A Revolutionary Approach to Workplace Noise Sampling

Over the years, various types of Sound Level and Octave Band Meters have been used by Industrial Hygienists and Safety Professionals for monitoring workplace noise, most requiring significant operator training and producing varying degrees of effectiveness.

At Larson Davis, we believe this is because until now, Sound Level Meters were designed primarily for use by Acoustical Engineers, not for Safety and Health professionals.

That's been changed forever — with SoundTrack® LxT!

The SoundTrack® LxT Sound Level Meter was developed to meet the unique needs of those involved in workplace noise exposure assessment and plant noise surveys. With its sleek ergonomic design — slender and able to be held and operated with just one hand — to its exceptional exposure data presentations, the SoundTrack® LxT is the perfect tool for gathering, analyzing, and presenting detailed noise environment data quickly, easily and concisely. New and better ways to organize your sampling methodology and annotate noise survey data save incredible amounts of time and provide better results, every time — all at a price that won't consume your entire instrument budget!

*Optional feature, consult factory for availability

Whether you're performing routine Sound Level Surveys or gathering precise frequency data for advanced Noise Control Engineering, SoundTrack LxT makes the job simple and easy!

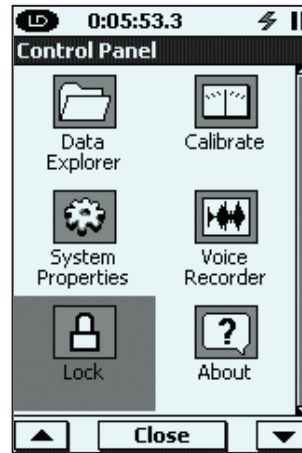

With its superior ergonomics and rugged compact design, SoundTrack LxT allows you to capture the data you need while keeping one hand free – invaluable for juggling multiple tasks in hard-to reach locations. Once a test starts, LxT automatically performs all the necessary calculations of workplace exposure - to multiple compliance standards. With the ability to 'hide' display screens that are not relevant to your sampling strategy, the LxT is configurable for maximum utility and ease-of use. Add in the "Store when Stable (Leq)" feature and selective keypad lockout, and you can comfortably hand off the SoundTrack® LxT to minimally trained technicians with assurance of a positive outcome. No more skipped locations, questionable results and missing data points!

Add to your effectiveness with on-board Digital Voice Annotation — and leave pencils and notebooks behind!

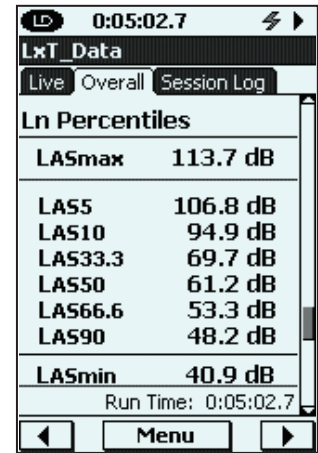

Now you can record your own observations about the environment, the worker and tasks performed, or even whether proper hearing protection is worn — all at the push of a button, using the Digital Voice Note Recording option and included headset microphone. At the end of the day, recorded notes can be played back right from your PC — they are digitally stored with related noise data and exposure calculations for future reference.

Real-Time Octave Band Frequency Data Available Instantly!

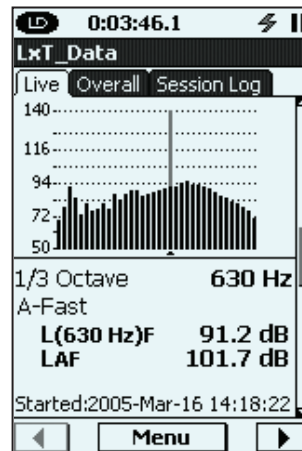

With optional 1/1 or 1/3 Real-Time Octave Band Frequency Analysis, the SoundTrack® LxT quickly captures far more accurate frequency band data, because all Octave (or 1/3 Octave) measurements are performed simultaneously. No more tedious "stepping through" each Octave Band, as in the past — all data are captured from virtually the same point in time; which is vital for maximum accuracy in a varying noise environment. What's more, you'll save significant amounts of time performing Octave Band measurements, which are an important part of determining effectiveness of Engineering Controls or selecting proper hearing protection devices (HPD's).

Document - Manage - Examine - Present

Generate Clear, Concise Reports of the Noise Environment — with Blaze® Software; a “Proven Effective” Tool for Documenting Workplace Noise Exposure!

Blaze® Software is an invaluable tool for generating the types of data reports and presentations you'll be proud to share with your colleagues, your workforce, and management. Color-rich graphic summary reports provide a picture of the noise environment with only the most relevant numeric data values, enabling everyone to quickly understand the nature of the noise exposure and possible problems the data may represent... hard-to-understand reports filled with 'data overload' generated by those 'other' programs are a thing of the past! With super-fast USB connection, you'll go from measurement to finished report in seconds. By accessing Blaze®'s more advanced features, you will be able to provide higher-level analysis of the noise environment with as much additional annotation as needed. Copy and paste functions allow for inclusion of data into other report formats, and — for the most advanced users and research teams — a simple export function allows instant and automatic interface to popular spreadsheet programs.

Whether you'd like a one-page illustrated compliance report or a detailed breakdown of noise data, Blaze® delivers effortlessly — and supports other great Larson Davis products like Spark® Noise Dosimeters and the HVM100 Vibration Exposure monitoring system — all at no extra cost! And, with our “no-hassle” software agreement, you'll never be hit with recurring licensing fees or other additional costs, should you choose to install Blaze® on other PC's or laptops within your organization.

Other Options and Accessories:

- **Community Noise Metrics (Ldn, Lden, CNEL)**
- **High-range Mic for firing range and silencer tests**
- **Built-in Voice Recorder (sounds, places, names, notes and observations)**
- **Blaze® PC Software**
- **Octave Analysis (1/1,1/3)**
- **Hard-shell Case**
- **Tripod**

Why Choose a Larson Davis Product?

Larson Davis has decades of experience in designing and building top-quality, affordable instruments that are fun to use and which perform to the highest demands of the professionals who use them.

We understand you have many choices when it comes to selecting noise and vibration instrumentation. When it comes to finding the best solution for your particular needs, Larson Davis has what it takes to help you choose exactly the right tool with confidence, backed by the best customer care in the industry. Larson Davis offers a standard 2-year warranty and every product we sell is supported by our pledge of Total Customer Satisfaction: If, for any reason, you are dissatisfied with a Larson Davis product or service, we will repair it, replace it or refund your money in full — up to ONE YEAR after date of purchase! No other company stands behind their products and services like Larson Davis.

General					
Integrating Sound Level Meter - Time weighting: <i>Slow, Fast, Impulse, TWA, Peak</i> (peak has independently selectable frequency weighting) Frequency weighting: <i>A, C, & Z, Octave, Fractional Octave</i> (with OBA options).					
Measurement Range	LxT1	LxT2	LxT1L with optional LOW RANGE Pre-amp	LxT2L with optional LOW RANGE Pre-amp	
	A	38 to 140 dB SPL	37 to 140 dB SPL	27 to 118 dB SPL	31 to 126 dB SPL
	C	37 to 140 dB SPL	37 to 140 dB SPL	29 to 118 dB SPL	35 to 126 dB SPL
Z	42 to 140 dB SPL	42 to 140 dB SPL	34 to 118 dB SPL	42 to 126 dB SPL	
SPL maximum level	140 dB SPL	140 dB SPL	118 dB SPL	126 dB SPL	
Peak maximum level	143 dB	143 dB	121 dB	129 dB	
Measurements (qty)					
SPL, Leq, TWA (2), Lmin, Lmax, Lpeak, Lpeak (max), Dose (2), Proj. Dose (2), Lep,d, E, E8, E40, SEA, Ln (6), Event Counters (3); (2 RMS, 1 Peak)					
Data Storage / Communication					
Flash Data Storage: 256MB standard, 2GB optional					
Communication to PC via USB2.0					
Display / Keypad					
Display: High contrast, monochrome, black on white, 1/8th VGA 160 x 240 dot graphics, 4 level grey-scale, bright white LED backlighting					
Keypad: Silicone elastomer "quiet touch" with tactile feedback, 4 dedicated function keys, 3 context soft-keys, and 5 navigation keys					
Power					
Internal: 4 AA cells, 1.5 Volts each; Alkaline, NiMH, or Photo-Lithium					
External: 5.0 VDC ±5%, 500mA maximum, USB powered					
Battery life: approximately 20 hours, depending on usage, alkaline cells					
Physical Characteristics					
Dimensions: 8.8" L x 2.8" W x 1.6" D (22.4 cm x 7.1 cm x 4.1 cm), 11.5" L (29.2 cm) with preamplifier and microphone					
Weight: 1.0 lbs (471 g), 1.1 lbs (513 g) with preamplifier and microphone					
Environmental					
Operating temperature: 14 to 122 °F (-10 to 50 °C)					
Storage temperature: -22 to 140 °F (-30 to 60 °C)					
Humidity: up to 95% non-condensing					
International Protection Rating: IP 54					
Standards Compliance					
ANSI: S1.4-1985 (R 2001), S1.43-1997 (R 2002), S1.25-1991 (R 2007), S1.11-2004					
IEC: 61672-2002, 60651-2001, 60804-2000, 61260-2001, 61252-002					
CE: Directive 2004/108/EC, IEC 61326-1:2005					

Other Great Products from the Larson Davis Industrial Hygiene Group

Noise Dosimeters

- ✓ Compact
- ✓ Rugged
- ✓ 100 Hour Battery Life

Vibration Exposure Monitors

- ✓ Hand-Arm per ISO 5349
- ✓ Whole-Body per ISO 2631
- ✓ Complete with sensors and easy to use

Remember, all of these instruments are supported by one great software — **Blaze®**

Consult factory for standard configurations and option availability.

*Optional feature, consult factory for availability
†Microphone and electrical self-noise included.
